Pass Task 11.1P: Prepare your learning summary report and portfolio

Task description:

This task provides you an opportunity to summarize what you have achieved for this unit. The learning summary report outlines how the work demonstrates that you have met all of the unit's learning outcomes and indicates the grade you believe you have demonstrated in your portfolio. In this report, you can justify why you should be awarded this grade, what you have learnt, and the unit's assessment criteria.

Instructions:

1. Download the template for the learning summary report from the task resources, and prepare your learning summary report. Please make sure that you clearly and concisely demonstrate your achievements in this report.

In the summary report, refer to the pieces to be included in your portfolio rather than re-writing them. Think of this like an index referring the reader to these pieces that demonstrate your achievements.

2. Create unit portfolio. Use the Portfolio Creation tool in OnTrack to guide you through the steps needed to create your portfolio. This will combine all of you work related to the tasks with your learning summary report. The learning summary report will go at the start of your portfolio, followed by all of your programs, screenshots, diagrams, etc. This is where all of our tasks are finally assessed in order to determine your portfolio grade.

Once it is created, you can download it and review it to make sure that you have included all of the aspects you think show off what you have achieved.

Submission:

No submission required. OnTrack is used for portfolio creation. Once the portfolio is created by OnTrack system, tutors will be able to assess it.
